Product leader with 10+ years building lending, credit and payments products, from zero-to-one at a startup to scale at a global bank. Hands-on builder of production AI agents and the financial workflows around them.

Experience

VP of Product 2022 – Present
Gynger Inc. New York, NY

- **0→1 & Scale:** Joined as employee #3 to lead the end-to-end product lifecycle for an AI-powered financing and payments platform, scaling it from initial launch to nearing 8-figures in revenue. Lead a team of 3.
- **AI Agents:** Architected Gynger's first AI agents, turning offer creation, underwriting and collections into multi-step autonomous workflows. Designed a defined routing hierarchy with human escalation for exceptions, and let vendors set underwriting policy in natural language. Wrote the specs and eval framework end to end; went from prototype to GA in 3 months.
- **Financing Suite:** Launched embedded financing in early 2023, built on an advanced underwriting model composed of many sub-policies; has facilitated $200M+ in originations.
- **Revenue Automation:** Led the mid-2024 launch of a suite that unifies AR workflows through deep ERP and CRM integrations across quote-to-cash, and lets tech vendors offer flexible payment options to their customers.

Vice President and Lead PM 2021 – 2022
Morgan Stanley New York, NY

- Scaled the Tailored Lending platform to support high 9-figure annual revenue, driving a 26% CAGR by optimizing credit workflows and digital borrower experiences.
- Led a multi-platform global initiative to transition the multi-billion dollar loan book to Fed-mandated Alternative Reference Rates (SOFR), ensuring regulatory compliance and mitigating systemic risk.

Product Manager 2015 – 2020
Morgan Stanley New York, NY / Montreal, QC

- Owned the end-to-end lifecycle of loan origination and servicing, managing initiatives across distributed teams in the US, India and Canada and a range of stakeholders.
- Launched a multi-collateral loan product, growing revenue $5M+ annually.
- Deployed a new loan origination system, driving 40% YoY loan volume growth.
- Automated servicing workflows and integrated APIs, cutting loan booking time 60%.

Tech and Data Business Analyst, Intern Summer 2014
Morgan Stanley New York, NY

Skills and Expertise
